Graduate, BA Architecture

Language

English

Degree

Bachelor of Arts (BA)

Location

Berlin-Charlottenburg

Start

October

Duration

4 years / 8 semesters

Credits

240 ECTS

BA ARCHITECTURE

Why Study at Whitecliffe University of Applied Sciences?

Whitecliffe offers a state-recognized, globally accredited education in the heart of Europe. With an international campus, English-taught programs, and strong industry connections, students gain practical experience in a personalized learning environment.

Small classes, innovative teaching, and strong career outcomes prepare graduates for successful global careers.

A Creative Approach to Contemporary Design and Construction Issues

The BA Architecture program at Whitecliffe University of Applied Sciences equips students with the skills and knowledge to develop **creative and responsible architectural solutions** across diverse cultural and geographical contexts.

Students explore the relationship between environments and their users while experimenting with innovative construction approaches. Supported by **internationally experienced teaching staff** and a **practice-driven learning environment**, students develop their talents and shape their professional paths.

Teaching Methods

The BA Architecture program prepares students for their professional future by helping them **develop creative and professional skills** across various areas of architecture. Critical thinking, openness, and **interdisciplinary collaboration** within an international context are at the core of the program.

The BA Architecture program is based on **project-based learning**. Students work individually and in groups, supporting both professional and personal growth while developing strong teamwork and collaboration skills.

Career Opportunities

A career as an architect offers the opportunity to improve living environments through creative, technical, and sustainable design. Graduates of the BA Architecture program develop a strong understanding of spatial design and how cultural, social, and technological factors shape the built environment. They apply this knowledge to solve complex architectural challenges.

Career opportunities include architecture and urban design firms, production design for film, television and theater, design agencies and fairs, the building materials industry, cultural and state institutions, construction companies, and freelance work.
