

Portfolio guidelines

10 work samples**1 PDF** compiled document**25 MB** max file size

What type of work should be included?

We are looking for different types of work that show your expertise gained at a prior university and potential professional experience gained in interior architecture and interior design.

Potential types of work:

- student work from your previous degree program(s)
- projects from your professional experience in interior architecture/interior design offices
- projects done as a freelancer
- group work or individual work

Please provide information about each project's context and your specific role/contribution. Include a brief caption text that:

- provides all relevant information for each project
- indicates university projects and their origin (3rd semester/short project/final project?)
- distinguishes your own freelance work from projects done for design offices
- defines the scope of what you did (e.g. Was it joint work [of how many]? Did you design it, or render it? Did you design the interior, the landscape, the facade and/or the building shown in the project?)

Most importantly, your portfolio should:

- demonstrate your range of experiences in interior architecture and design and potentially adjacent fields

How should the work be presented?

Please bear in mind that we would like to be able to understand each project and provide conclusive material such as:

- technical drawings (e.g. plans, sections, [interior] elevations, details)
- renderings and/or perspectives
- sketches and/or conceptual drawings
- a short introduction text for the project and information on the context (as described above)

What is the right format?

Please include 10 samples from your work compiled in a single PDF; the maximum file size should not exceed 25 MB.

Applying as a transfer student?

The work you submit must reflect all competencies you have gained in your successfully completed university courses within the same degree program. It should demonstrate your ability to succeed at the level of study corresponding to the semester you will be transferring into.

Good luck!
